SOIL-G

SOIL-G is a unique granulated product derived from Seaweed and other natural sources for improving soil structure, healthy plants, and protection from soil borne disease.

DOSAGE

Basal dose or Top dressing:
3 to 5 kg per acre.

INGREDIENTS

Seaweed, Soil beneath of tree, Spoiled Milk and Banana, Cow Urine, Granules.

CROPS

Suitable for all crops.

PACK SIZE

1 Kg, 5 kg.

Benefits of SOIL-G

- Improves the physical, chemical, and biological structure of the soil.
- Helps protect plants from soil-borne diseases.
- Improves plant growth by establishing strong stem, primary and secondary roots.
- Stimulate and increase beneficial microbial activity in the soil.
- Improves water retention capacity of the soil.
- Strengthens tolerance against adverse environmental conditions and climatic stress.
- Useful to prepare bio compost.
- Other fertilizer dosages may reduce gradually.
- Safe for earthworms.

RAPIDOS

Rapidos is the ideal blending of Seaweeds with Gliricidia Sepium, Aloe Vera, and cow urine, which improve plant growth and mitigate the damage done by pest and disease.

DOSAGE

Foliar Application : 2 to 3 ml per liter of water.
Soil Application : 1 liter per acre.

INGREDIENTS

18% Extract of Seaweed, Gliricidia Sepium, Aloe Vera and Cow Urine.

CROPS

Suitable for all crops.

PACK SIZE

1 ltr, 500ml, 250ml.

Benefits of RAPIDOS

- Stimulate plant growth and promote uptake of nutrients.
- Enhance the efficiency and growth of healthy roots of the plant.
- Enhance flowering and fruit setting, Prevents shedding of immature flowers and fruits.
- Improve size, color and extends the shelf life of agricultural produce.
- Increase the quality and yield of produce.
- Improve plant growth, protects plants, and make crop withstand adverse conditions such as cold, heat, and water stress.
- Increase water holding capacity of the soil and helps resist drought.
- Reduce the usage of other insecticides/pesticides to a greater extent.
- Completely safe for humans, animals, and the environment.

NECHROY

NECHROY is the ideal blending of Seaweeds, Gliricidia, Cow Urine, and other naturally available sources, which improve plant growth, quality, and quantity of produce.

DOSAGE

Foliar Application : 2 to 3 ml per liter of water.
Soil Application : 1 liter per acre.

INGREDIENTS

12% Extract of Seaweed, Gliricidia Sepium, Botanical Extracts and Cow urine.

CROPS

Suitable for all crops.

PACK SIZE

1 ltr, 500ml.

Benefits of NECHROY

- Enhance the efficiency and growth of healthy roots of the plant.
- Stimulate plant growth and promote uptake of nutrients.
- Improve size, color and extends the shelf life of agricultural produce.
- Make crops withstand adverse conditions like cold, heat, and water stress.
- Increases water holding capacity of the soil and helps resist drought.
- It reduces the use of chemicals / other agriculture inputs to a greater extent.
- Completely safe for humans, animals, and the environment.

ORSHIELD

ORSHIELD is an ideal blending of Seaweeds, Aloe Vera, Allium Sativum. It improves plant growth, health and plant defense system. Protects from various pest and disease.

DOSAGE

Foliar Application: 3 to 4 ml per liter of water.
Soil Application : 1 liter per acre.

INGREDIENTS

6% Extract of Seaweed, Aloe Vera, Allium Sativum, Botanical Extracts, and Cow urine.

CROPS

Suitable for all crops.

PACK SIZE

1 ltr, 500ml.

Benefits of ORSHIELD

- Improve plant growth and promote uptake of nutrients.
- Protect the plant by increase resistance against parasites and diseases effectively.
- Disrupts the growth cycle of parasites and deters them from feeding on plants.
- Make crop with stands adverse conditions as cold, heat, water stress.
- An effective component of IPM programs.
- Reduce the usage of other insecticide/pesticide to a greater extent.
- It does not create resistance, resurgence or residue problems.
- Safe to natural parasites, predators and pollinators.

JAMINOS

“

JAMINOS is granulated product derived with Seaweed and unique botanical extracts for healthy plant, improve soil quality, and more yield.

”

DOSAGE

Basal dose or Top dressing:
3 to 4 kg per acre.

INGREDIENTS

Botanical Extracts - 2%, Seaweed Extracts - 5%,
Granules - 93%.

CROPS

Suitable for all crops.

PACK SIZE

2 Kg.

Benefits of JAMINOS

- Improves the physical, chemical, and biological structure of the soil.
- Stimulate plant growth and promote uptake of nutrients.
- Enhance the efficiency and growth of primary and secondary roots of the plant.
- Increases the quality and yield of produce.
- Strengthens tolerance against adverse environmental conditions and climatic stress.
- Improves water retention capacity of the soil.
- Other fertilizer dosages may reduce gradually.
- Completely safe for earthworms, humans, animals, and the environment.

TREEDOS

“ TREEDOS is an innovative granulated product developed with Seaweed and unique botanical extracts to protect the root system, improve plant and soil health for better quality and yield.

”

DOSAGE

Basal dose or Top dressing:
5 to 6 kg per acre.

INGREDIENTS

Botanical Extracts - 3%, Seaweed Extracts - 7%,
Granules - 89%.

CROPS

Suitable for all crops.

PACK SIZE

2 Kg.

Benefits of TREEDOS

- Improves the physical, chemical, and biological structure of the soil.
- Stimulate plant growth and promote uptake of nutrients.
- Enhance the efficiency and growth of primary and secondary roots of the plant.
- Enables the roots to go deeper and absorb the nutrients in the lower layer of the soil.
- It Helps protect plants from soil borne diseases.
- Enhance flowering and fruit setting, Prevents shedding of immature flowers and fruits.
- Increases the quality and yield of produce.
- Strengthens tolerance against adverse environmental conditions and climatic stress.
- Improves water retention capacity of the soil.
- Completely safe for earthworms, humans, animals, and the environment.

FULMOR

FULMOR is a unique blending of Seaweeds, Botanical Extracts, and Cow Urine to enhance flowering, fruiting, and strengthening plants against adverse climatic conditions.

DOSAGE

Foliar Application : 3 to 4 ml per Liter of water.
Soil Application : 500 ml to 1 Liter per acre.

INGREDIENTS

20% Extract of Seaweed, Gliricidia Sepium, Botanical Extracts and Cow urine.

CROPS

Suitable for all crops.

PACK SIZE

1 Ltr.

Benefits of FULMOR

- Stimulate plant growth and promote uptake of nutrients during the flowering stage.
- Increases the number of flowers and leaves by providing nutrients.
- Helps increase micronutrient uptake by the plants and improved pollen germination.
- Prevents the shedding of immature flowers and fruits.
- Safe to pollinators and predators.

FULSET

FULSET is a unique blending of Seaweeds, Aloe Vera, and other botanical extracts to prevent flower drop, enhance flower setting and fruiting.

DOSAGE

Foliar Application : 3 to 4 ml per Liter of water.
Soil Application : 500 ml to 1 Liter per acre.

INGREDIENTS

15% Extract of Seaweed, Aloe Vera, Botanical Extracts and Cow urine.

CROPS

Suitable for all crops.

PACK SIZE

1 Ltr.

Benefits of FULSET

- Optimizes overall growth in the fruit setting phase.
- Helps attract pollinators.
- Increases the length and width of leaves.
- Helps retain fruits and flowers and reduces dropping.
- Helps maintain uniform growth and shape of new developing fruits for best quality and production.
- Improves plant growth, protects plants, and makes crops withstand adverse conditions.
- Safe to pollinators and predators.

SIZEUP

SIZEUP is a unique blending of Seaweeds, Butea Monosperma, and other natural resources to enhance the size and weight of the produce.

DOSAGE

Foliar Application: 3 to 4 ml per Liter of water.
Soil Application : 500 ml to 1 Liter per acre.

INGREDIENTS

18% Extract of Seaweed, Gliricidia Sepium, Butea Monosperma, Botanical Extracts and Cow urine.

CROPS

Suitable for all crops.

PACK SIZE

1 Ltr.

Benefits of SIZEUP

- Supports overall plant growth and promotes the uptake of nutrients.
- Enhances the efficiency and growth of healthy roots of the plant.
- Helps to increase fruit size and weight of produce by improving the translocation system inside the plant during the fruit development stage.
- Helps to maintain uniform growth and shape of produce for best quality and yield.
- Helps to enhance the elasticity and permeability of cell membranes, which reduces fruit cracking.

LIGHTUP

“

LIGHTUP is an ideal blending of Seaweeds and unique botanical extracts to Improve the luster, aroma, flavor, and taste of the produce.

”

DOSAGE

Foliar Application: 3 to 5 ml per Liter of water.
Soil Application : 500 ml to 1 Liter per acre.

INGREDIENTS

12% Extract of Seaweed, Gliricidia Sepium, Aloe Vera, Butea Monosperma and Cow urine.

CROPS

Suitable for all crops.

PACK SIZE

1 Ltr.

Benefits of LIGHTUP

- Improve quality by enhancing the luster, aroma, flavor, and taste of the produce.
- Helps to develop uniform color, increase fruit size and taste.
- Extends the shelf life of agricultural produce.
- Increase water and sugar holding of the capacity of produce.

WATCHMAN

WATCHMAN is an ideal blending of seaweeds with botanical extracts, which improves plant growth, Strengthens the defense system and repellant insects and pests.

DOSAGE

Foliar Application : 4 to 5 ml per Liter of water.
Soil Application : 500 ml to 1 Liter per acre.

INGREDIENTS

6% Extract of seaweed, Trigonella Foenum Graecum, Botanical Extracts and Cow urine.

CROPS

Suitable for all crops.

PACK SIZE

1 Ltr.

Benefits of WATCHMAN

- Protects the plant by increasing resistance against parasites and diseases effectively.
- Increases the ability of plants to resist the attack of germs and diseases
- Helps disrupt the growth cycle of parasites and deters them from feeding on plants.
- It does not create resistance, resurgence, or residue problems.
- Improve plant growth and promote uptake of nutrients.
- An effective component of IPM programs.
- Reduce the usage of other insecticides/pesticides to a greater extent.
- Suppress the growth of many fungal diseases and reduce plant pathogenicity.
- Safe to pollinators and predators.
